THE ULTIMATE
FIBREGLASS ROOFING SYSTEM

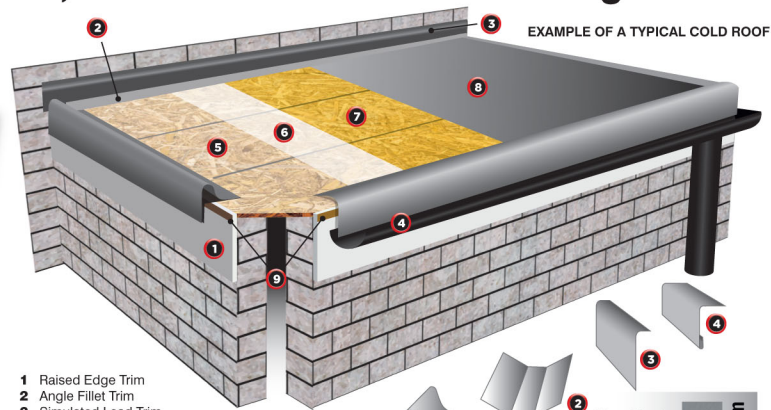

High Resistance Formula

Durable & Seamless

Weatherproof Flat Roofs

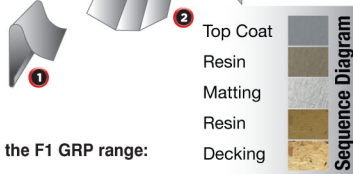

Any Size, from Small Domestic to Large Commercial

EXAMPLE OF A TYPICAL COLD ROOF

- 1 Raised Edge Trim
- 2 Angle Fillet Trim
- 3 Simulated Lead Trim
- 4 Drip Trim
- 5 2400mm x 600mm, 18mm OSB3 T&G decking
- 6 450g/m² Chopped strand mat - 600g/m² or 2 x 450g/m²
- 7 F1 Polymeric Base Resin (reinforced with Fibreglass)
- 8 F1 UV Protectant Surface Topcoat
- 9 Support batons

Products within the F1 GRP range:

GRP Stands for 'Glassfibre Reinforced Plastic', more commonly known as 'Fibreglass'

It is a very strong and tough material - seven times the flexural strength of steel - yet very lightweight & flexible with high energy absorption properties that make it impact resistant and maintenance free.

GRP is not a new process, it has been around since 1938 and since then has become the material of choice for racing cars, boats, baths & aeroplanes.

This system is Durable, Stylish, Cost Effective, Maintenance Free and is Cold Applied i.e. no blow torches or live flames.

F1 GRP is a high resistance formula based on flexi-resins that fuse together to form a complete composite, fully bonded roof that is impervious to water, seamless and robust enough to withstand regular foot traffic.

The F1 system accommodates normal structural expansion and contraction and can be moulded and shaped into and around even the most complex of architectures, maintaining integrity in all weathers. F1 GRP is a long term, leak free and cost effective system for flat roofs of any size or complexity, from small dormers to large domestic and commercial projects. GRP roofing technologies are tried and tested and are extensively used for the refurbishment of existing and new roofs, by local authorities, architects and major building contractors throughout the UK.

Any Complexity, from Intricate Heritage Projects to Bespoke Architectural Designs

- Extensions
- Garages
- Dormers
- Porches
- Balconies
- Bay Windows
- Summer Houses
- Stairs
- Green Roofs
- Walkways & Terraces
